# What To Do if You Already Have a **Solid Database**

## Revisit & Audit Your Current Database **Re-marketing & Nurture System**

If you already have a decent size database (and CRM), you now need to get all of those leads on Dynamic Listing Alerts, Dynamic Remarketing, Priority Alerts and AI-assisted text communication!

# Important Tip: Do Email Listing Alerts + Dynamic Remarketing

1

If you have an aged database, your former (or current) IDX platform **probably has sunsetted MOST of your listing alerts.**

Overall Lead Database

1-50 of 48549 Leads

Returned in last 30 days

1-50 of 2319 Leads

2

According to NAR, the average **consumer uses 3-5 websites to view listings** while searching for homes. Occupy 2 of those views instead of just 1 with listing alerts + remarketing

3

When someone opens a listing alert or clicks on one, **we track that behavior and gear remarketing to target those people MORE**, this helps us ID which buyers are most interested in homes.

Theodore Roosevelt

It is Vital to Stay  
**“Top of Mind”** to  
Your Entire Database

## “The Multiplication Effect” of Your Database

**It's Vital that you build an AUTOMATED SYSTEM to stay in front of your database 24/7!**

- ✓ **82%** of all real estate transactions are the result of contacts from previous clients, referrals, friends, family, and personal contacts. (Source: Buffini & Company)
- ✓ **74%** of buyers would use their agent again or recommend them to others (Source: National Association of REALTORS)
- ✓ **84%** of consumers say they trust recommendations from family, friends, and colleagues, making peer recommendations the highest-ranked information source in trustworthiness. (Source: Nielsen)

# **“The Multiplication Effect” of Your Database**

**The Obvious Power of the “Multiplication Effect” is that:**

- ✓ MANY people buy an investment property or a second home
- ✓ MOST people buy multiple homes over their lifetimes
- ✓ EVERY person has friends and family

**So, what are 5k, 25k, 50k, or 100k leads (relationships) really worth?**

# The Cost of Poor Lead Follow Up

*“Hindsight is 20/20 but my first year was a bit chaotic and I know that I lost a lot of sales due to not being organized and not working the system properly. There was actually a point where I had almost 1000 overdue tasks with 500 unattended leads but I finally got it down to 0 and feel that I’m at last on top of it. Unfortunately, I now know with certainty, having followed up with all of these people, that over 50 homes have been purchased by the leads that are in my database and those are only the ones that I know about. Every week I contact a past lead that bought a home with another agent. At first it was a kick in the gut hearing from a lead in my database that they had bought a home with someone else, but it has taught me just how important it is to stay in front of all of the leads in my database. Needless to say, all these lost sales won't happen again in the new year. I plan to double sales, if not more!”*
